

Sword

You will need:

- Thick card (like the card used for boxes)
- Sellotape
- Glue
- Parcel tape (if you have it)
- Aluminium foil
- Scissors

What to do:

1. Cut out two pieces of card 40cm by 8cm
2. Cut out two pieces of card 18cm by 4 cm
3. Mark the centre of the big pieces of card at the short edges.
4. To form the handle cut into one end of the big piece of card 1.5cm inwards and 7cm down on both sides.
5. To form the sword point, make a mark 8cm from the other end on the blade edges and cut from the middle to this mark on both edges.
6. Do the same on the other piece of big card so these two pieces match exactly.
7. Glue them together.
8. Take the smaller pieces of card and glue them across the sword at the bottom of the handle to form the sword hilt (one in front and one behind). Secure firmly with lots of sellotape.
9. If you have parcel tape you can neaten the handle by putting tape over the handle and hilt.
10. Finally wrap your blade in foil and secure with glue.
